Part # 4967

Slim Design Ultraviolet LED Leak Detection Light

Operating Instructions

Caution: Always wear hand and eye protection when servicing a vehicle's A/C.

Part #4967 – Slim Design LED Leak Detection Light

- **Detects most UV Dyes for A/C, Fuel, Motor Oil and Hydraulic Fluids.**
- Easy to use. Slim design for easy pocket carry.
- Made from anodized, aircraft-grade aluminum.
- 3 – AA batteries included.

Operating Instructions:

- Unscrew cap at the bottom of the light. Load batteries.
- Twist the light head for on/off function.

Battery Functionality & Replacement:

- Battery life depends on a variety of factors such as frequency of use, length of storage, battery quality and condition, and environmental conditions.
- Compatible with all disposable and rechargeable 1.5V AA batteries.
